I developed this Expert Exhibit on Electronic Portfolios for Apple Computer as an Apple Distinguished Educator. I was flown down to Apple's office in Austin to record the video clip, which I am not very pleased with the results...

Introductory text

This is my collection of artifacts that are selected to demonstrate specific competencies in portfolio development knowledge and skills. I have been researching, presenting and writing about electronic portfolios since 1991. This collection shows the growth in my thinking about electronic portfolio development between 1991 and 2004.

My Professional Portfolio

Welcome to my TaskStream e-portfolio. I am exploring the capabilities of using this system to maintain electronic portfolios as part of my research on implementation of online electronic portfolio systems.

Click on one of the links at the top to see the pages that I have decided to include in this version of my portfolio. You can read my biography, see the artifacts that I have identified as my best work, and read my reflections about creating this portfolio. If you follow a link and want to return, use the Back button on your browser.

Every portfolio has a purpose. My purpose for developing this portfolio is to show my skills in developing an electronic portfolio using any number of tools. After reviewing all of my artifacts (see my Portfolio at a Glance) I found five general categories of competencies:

1. Electronic Portfolio Competency - Knowledge, Skills and Experience
2. Digital Storytelling Competency - Digital Video Editing Skills
3. Technology Competency - Multimedia & Web Page Authoring Skills
4. Teaching & Instructional Design Competency - Presentations
5. Writing & Assessment Competency (My Publications)
Add new file attachments to web page: Portfolio-at-a-Glance
Click the 'Browse' button to select a file that you want to attach, then click 'Add File'. When done, add more resources or close window.

1. Name file
2. Select file
3. Describe file (optional)
4. Standards (optional)
   - Do not show standards that this artifact addresses
   - Attach standards that this artifact addresses (You will select standards after clicking 'Add File')

Spell Check  Add File

View or delete already attached files

File 1: Portfolio-at-a-Glance (Excel)
I spent an evening going through my web pages and my hard drive (my digital archive) to select the specific artifacts that I wanted to use in my portfolio. I set up this Excel spreadsheet that let me list the artifacts (21 in all) and then create hyperlinks to each URL. If your browser will not open an Excel file, open the next version (in PDF).
After selecting the artifacts, I tried to identify which competencies or skills each artifact demonstrates. I found five or six major categories right now, maybe more when I think about it. But the major categories have emerged. Now, all I have to do is create a collection for each grouping, and write an overall reflection plus record the captions. Since I had all of the artifacts on one of my websites, all I had to do was capture the URL.

From start to finish this project took me an evening, and most of the time was spent in selecting the artifacts and writing the captions. Those aren't really technology issues...they are portfolio issues.
These documents showcase my competencies in this portfolio.

My Portfolio Competency - A collection of links to demonstration of my competency in portfolio development

My Digital Storytelling Competency - Links to digital stories

My Technology Competency - Links to examples of my technology competency

My Instructional Design & Teaching Competency - Links to evidence of teaching and instructional design
